

The embodiments of the invention in which an exclusive property or privilege is claimed are defined as follows:

1. A mounting assembly for a container having a neck with a lip, comprising:
  - a) a rigid lip mount shaped to fit on top of said lip, said lip mount defining an aperture shaped to threadably engage a housing for a shaft;
  - b) a cover for the container, said cover shaped to secure said lip mount to the lip by threadably engaging with the neck, said cover defining an aperture shaped to allow passage of said housing;
  - c) mixing means comprising a shaft with a housing, a motor and an impeller.
2. The mounting assembly of claim 1 wherein said lip mount is disc shaped.
3. The mounting assembly of claim 2 wherein said lip mount is made of metal.
4. The mounting assembly of claim 3 wherein said cover is shaped to threadably engage said housing.
5. The mounting assembly of claim 4 further comprising a gasket shaped to support said lip mount on top of said lip.
6. The mounting assembly of claim 4 wherein the underside at the edge of said lip mount is padded.
